|0.00|> Well, I expect very, very different students in the future.<|16.80|><|16.80|> We are right now seeing a big change, but I think that in the future the change will<|22.76|><|22.76|> be higher.<|23.76|><|23.76|> I think that it will be more comfortable with every technology that we can manage in<|29.44|><|29.44|> the future. I think that they will embrace lifelong learning as a must, recognizing the need to continually acquire new skills, new knowledge, and a path to evolving careers and industries. I think that they will be less dependent on traditional classroom instruction and more adept to self-paced and independent learning. I think that this will be one of the main changes for the future.

0:00:56

I also think that they will have a very global perspective. They will live in a more global world than right now, and a very, very interconnected world. And I think that this will be another strong characteristics of the students of the future with a lot of collaboration with different places, from different cultures, languages, and countries. I think that there will be less focus on memorizing and more interest in applying knowledge in real-world challenges. They will embrace uncertainty and the opportunities to grow.

0:01:32

I think that they will be really, really concerned about social responsibility. And probably they have a more innovative and entrepreneurship spirit. I think that in this sense, we expect very, very, very different student that we have right now. And we need to change everything in terms of faculty and in terms of university to manage these new students. of university to manage these new students.
